Why Muzinich High Income Floating Rate Fund?

Principal Investment Strategies

- Muzinich High Income Floating Rate Fund aims to provide investors with stable, floating rate returns from a diversified pool of long only U.S. and foreign corporate issuers.
- The Fund will access the floating rate credit markets, in particular loans, across industries and predominantly within sub-investment grade ratings brackets.
- Muzinich's proprietary research process is particularly credit-intensive and investment decisions are based on quantitative and qualitative analysis using internally generated financial models and projections.
- Muzinich places particular emphasis on a rigorous and proactive sell discipline to mitigate downside volatility.
- All foreign securities are 100% hedged back to the U.S. dollar

Research Process

Our process is designed around our relative value lending philosophy

- Build a deep understanding of the business models of the companies to which we lend
- Conduct proprietary quantitative analysis and stress test our investment assumptions for difficult environments
- Consider a security's liquidity profile when constructing a diversified portfolio
- Analyze creditworthiness of an investment with focus on cash flow and asset protection

Country Diversification

Net Performance

	as of March 31, 2019		as of March 31, 2019
	1 Month	Since Inception	Since Inception
Muzinich High Income Floating Rate Fund - Inst.	-0.30%	1.77%	1.77%
Credit Suisse Leveraged Loan Index	-0.12%	2.53%	2.53%

Fund Objective

Seeks to provide a high level of income with a focus on principal preservation and reduced exposure to changes in interest rates.

Fund Description

The Floating Rate Fund normally invests at least 80% of its net assets in floating rate bonds or loans. The Fund's portfolio is typically well-diversified with short duration below investment grade floating rate bank loans and notes that we believe have attractive risk/reward characteristics and which are issued by U.S. and foreign corporations.

All return figures over one year are annualized. The Muzinich High Income Floating Rate Fund's inception date is 6/29/18.

Performance data quoted represents past performance and does not guarantee future results. Investment returns and principal value will fluctuate, and when sold, may be worth more or less than their original cost. Current performance of the Fund may be lower or higher than the performance quoted. Fund performance to the most recent month-end can be obtained by calling 1-855-Muzinich (689-4642) and pressing "0" to speak to a customer service representative. The Fund imposes a 1.00% redemption fee on shares held for less than 90 days. Performance data does not reflect the redemption fee. If reflected, total returns would be reduced.

Net returns are net of fees, expenses and fee waivers and/or expense information. Other share classes may have different fee schedules. Net expenses can range between 0.55%-0.90% not including any front end sales charge or redemption fees that may be incurred, which will impact net returns. Refer to the Fund's Prospectus for specific fee expense information. Returns assume a reinvestment of income. However the fund's performance may not be representative of all investor's experience as investors may elect to receive cash distributions of all, or a portion of, realized current income.

Credit Suisse Leveraged Loan Index - The CS Leveraged Loan Index is designed to mirror the investable universe of US dollar denominated leveraged loan market. The index is rebalanced monthly on the last business day of the month instead of daily. Qualifying loans must have a minimum outstanding balance of \$100 million for all facilities except TL A facilities (TL A facilities need a minimum outstanding balance of \$1 billion), issuers domiciled in developed countries, at least one year long tenor, be rated "5B" or lower, fully funded and priced by a third party vendor at month-end. You cannot invest directly in an index.

Investment Values

- ◆ We commit to rigorous credit analysis. We believe that in-depth credit research, rather than credit engineering, is the long-term driver of attractive risk-adjusted returns
- ◆ We respect risk. We invest with an understanding of the asymmetric risk posed by credit investments
- ◆ We perform our own bottom-up research. We do not rely solely on ratings agencies or the views of other external providers
- ◆ We are results-focused. Our process is time-tested and repeatable

Firm Values

- ◆ Muzinich is privately owned and independent. We believe independence allows integrity in thought and action
- ◆ We take our fiduciary responsibilities seriously. Trust is the foundation on which the firm is built
- ◆ We are transparent. We seek transparency in our investments and we offer transparency to our investors
- ◆ We are team-oriented. We adhere to a flat structure to encourage idea generation and debate

Top 10 Sectors

²The fund itself has not been rated by an independent rating agency. Credit quality ratings exclude cash and derivatives and are based on the underlying securities of the fund. Credit quality ratings reflect the first publicly-available rating from surveying, in order, Moody's and Standard & Poor's, converted to the equivalent Moody's major rating category. If none of these agencies rate an asset, "Non-Rated" is assigned. **Non-Rated securities do not necessarily indicate low quality.** "Other Fixed Income" includes investment vehicles such as fixed-income closed-end funds, exchange traded funds, and mutual funds. "Other Fixed Income" and "Not Rated" represent assets that have not been rated by a Nationally Recognized Rating Agency.

Important Disclosure

Fund sector diversification data are excluding cash, cash equivalents and derivatives are subject to change and are not recommendations to buy or sell any security.

SEC Yield Subsidized is a standard calculation of yield introduced by the SEC to provide fairer comparison among funds. This yield reflects the dividends and interest earned after deducting the fund's expenses during the most recent 30-day period covered by the fund's filings with the SEC. SEC Yield Un-Subsidized represents what a fund's 30-Day SEC Yield would have been had no fee waivers or expense reimbursement been in place over the period. Negative 30-Day SEC Yield results when accrued expenses of the past 30 days exceed the income collected during the past 30 days. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security's price to changes in interest rates. Cash Flow is the net amount of cash and cash equivalents moving into and out of a business.

The fund invests in high yield debt instruments which tend to be less liquid than higher quality debt instruments. Diversification does not assure a profit nor protect against loss in a declining market. Mutual fund investing involves risk. Principal loss is possible. Investments in debt securities typically decrease in value when interest rates rise. This risk is usually greater for longer-term debt securities. Investment by the Fund in lower-rated and non-rated securities presents a greater risk of loss to principal and interest than higher-rated securities. Investments in foreign securities involve greater volatility and political, economic and currency risks and differences in accounting methods. These risks are greater for emerging markets. Derivatives involve risks different from, and in certain cases, greater than the risks presented by more traditional investments. These risks are fully disclosed in the prospectus. Floating rate loans may not be fully collateralized and therefore may decline significantly in value. The fund will bear its share of the fees and expenses of investments in underlying funds or ETFs. Shareholders will pay higher expenses than would be the case if making direct investments in underlying funds or ETFs. Because the fund invests in ETFs, it is subject to additional risks that do not apply to conventional mutual funds, including the risks that the market price of an ETF's shares may trade at a discount to its net asset value ("NAV"), an active secondary trading market may not develop or be maintained, or trading may be halted by the exchange in which they trade, which may impact a fund's ability to sell its shares. The fund may make short sales of securities, which involves the risk that losses may exceed the original amount invested. Please note that while the fund's prospectus states that the fund may use leverage, and that it may make short sales of securities, which involve the risk that losses may exceed the original amount invested, the Fund's portfolio managers do not anticipate engaging in either practice. There can be no assurance that fund objectives will be achieved.

The fund's investment objectives, risks, charges and expenses must be considered carefully before investing. The Summary Prospectus and Statutory Prospectus contains this and other important information about the investment company, and it may be obtained by calling 1-855-Muzinich, or visiting www.MuzinichUSfunds.com. Read it carefully before investing.

The Muzinich Mutual Funds are distributed by Quasar Distributors, LLC.
